

TEJAS DAVANDE

Mumbai, Maharashtra 400069, India | +91 8355921337 | tejasdavande99@gmail.com | [Linkedin](#)

Professional Summary

Backend Developer with 3+ years of experience in scalable Node.js/NestJS systems, improving API performance by 85% and reducing server load by 80%. Built payment and media pipelines processing ₹8L+ GMV and 5K+ files daily on AWS-based microservices architecture.

Experience

Software Development Engineer II August 2023 – Present

Ink In Caps | Mumbai, Maharashtra, India

KNKY - Core Backend Services

- Designed high-throughput REST APIs serving production traffic, reducing latency **85% (8s → ~1.5s)** via async processing, query optimization, and caching
- Developed secure AWS S3 direct upload pipeline using presigned URLs and multipart transfers (**5K+ uploads/day**), reducing server bandwidth consumption
- Delivered MongoDB geospatial search system (<200ms across **10K+ locations**) powering real-time matchmaking and **7–8% conversion uplift**
- Established enterprise authentication and RBAC framework (SSO, 2FA, automated moderation) supporting **18K+ users and 50+ permission rules**
- Operated auto-scaling AWS infrastructure with load balancing, monitoring, and desktop data synchronization services
- Modernized legacy JavaScript monolith into modular NestJS architecture with dependency injection, improving scalability, testability, and long-term maintainability

Knky-AssetOptimiser - Media Processing Microservice

- Created standalone media processing microservice offloading **80% core server load**, processing **5K+ files/day** across images, HLS video, and audio
- Orchestrated asynchronous job pipeline using **BullMQ + S3** with concurrency control, retries, and real-time monitoring
- Enabled secure adaptive bitrate HLS streaming with signed token-based access control and media caching, leveraging public/private S3 storage for scalable multi-device content delivery

Hefty Verse - Gaming and E-Commerce Platform

- Delivered Stripe payment integration processing **600+ monthly transactions** (₹8L+ GMV, **98% success rate**) with full e-commerce lifecycle
- Launched gamification engines (Spin Wheel, leaderboards, rewards) driving **800+ daily active users**
- Connected coupon marketplace serving **4,000+ monthly coupons** with **60% redemption rate**
- Deployed AI conversational characters boosting engagement by **25%**, and built queue-based local AI image generation pipeline for asynchronous processing

Operations Officer December 2020 – May 2023

RDC Concrete India Pvt. Ltd. | Mumbai, Maharashtra, India

- Achieved **100% system uptime** reducing downtime by 50% through monitoring workflows; managed Oracle/DMS procurement tracking with **500+ monthly records** and zero discrepancies.

Technical Skills

Languages & Frameworks: JavaScript (ES6+), TypeScript, Node.js, NestJS, Express.js

APIs & Real-Time: REST APIs, WebSockets, Socket.io

Databases & Caching: MongoDB (Geospatial), PostgreSQL, Redis, Firebase

Cloud & Infrastructure: AWS (EC2, Lambda, S3, SES, Route 53, ALB, Auto Scaling, Multipart Upload), CI/CD, Load Balancing, Git, Docker

Messaging & Jobs: BullMQ, RabbitMQ, Agenda.js

Media Processing: FFmpeg, Sharp, HLS Streaming

Security: JWT, SSO, 2FA/TOTP, CASL Authorization

Architecture: Microservices, Asynchronous Processing, Event-Driven Systems, Performance Optimization

Education

Bachelor of Engineering in Mechanical Engineering August 2016 – November 2020

Rajiv Gandhi Institute of Technology, Andheri, Mumbai | *University of Mumbai* | CGPA: 8.67/10

Additional Information

Community Leadership: Youth Leader at **Hariprabodham Foundation** (2015–Present) – Organizing weekly assemblies for youth development and community engagement
